

# CrēdoGO™

## Commercial Pharma's Answer to Flexible, Reliable & Sustainable Shipping

Every pharma shipment represents more than just product — it's a promise to patients. CrēdoGO helps you keep that promise with proven thermal performance, modular efficiency, and a reusable design that flexes to fit your operations. It's the cold chain solution built to support life sciences — and the patients behind every payload.

## Built for What Matters Most

CrēdoGO was designed with your priorities in mind — from protecting patients and products to streamlining operations and supporting sustainability goals.

With CrēdoGO, you gain:

### Shipping Efficiency

A modular design that maximizes payload space and keeps high-volume operations moving smoothly.

### Pack-Out Simplicity

Standardized processes reduce errors and training time, helping your team focus on what matters most.

### Sustainability That Performs

Fully reusable and built to last, CrēdoGO supports your ESG goals without compromising performance.

### Reliable Cold Chain Protection

Engineered for precision, CrēdoGO helps prevent costly temperature excursions and last-mile surprises.

### Patented TIC Design

A thinner core pushes PCM to the edges, delivering efficient thermal protection and safeguarding your payload from excursions.

### Smart, Scalable Logistics

Flexible configurations and optional IoT monitoring help you adapt as your supply chain evolves.

### → Temperature Ranges

+2°C to +8°C  
+15°C to +25°C  
Below -18°C

### → Duration

Up to 144 hours

### → Reusability

5+ years with  
standard use

### → Design

Modular, stackable &  
easy-to-condition

### → Visibility

Optional IoT-enabled  
monitoring

### → Sustainability

Fully reusable  
with minimal waste

# CrēdoGO™

## Made for the Real World

Ideal for commercial pharmaceutical manufacturers and logistics providers who need a scalable, sustainable solution for high-volume, temperature-sensitive shipments. CrēdoGO is built to perform in global supply chains where timing is critical and product integrity is non-negotiable.

## Your Cold Chain Advantage

Performance alone isn't enough. When you choose CrēdoGO, you're not just getting a shipper — you're gaining access to a suite of services and technologies designed to elevate your entire operation. From cost analysis to sustainability insights to logistics agility and intelligent asset management, we help your team make better, faster and more informed decisions at every step:

### Total Cost of Ownership Calculation

See the full financial picture. We break down visible and hidden costs — like freight, conditioning, inventory, and product loss — to help you choose the most cost-efficient shipping solution.

### CO<sub>2</sub> Footprint Calculation

Make informed, planet-friendly decisions. Our Life Cycle Assessments (LCAs) and advanced emissions tools help you measure and reduce your environmental impact with every shipment.

### High-Velocity Conditioning

Accelerate readiness for time-sensitive shipments. Our advanced conditioning services reduce preparation time from days to hours, enabling faster delivery of your temperature-sensitive therapies at scale without compromising performance.

### Return Management System (RMS)

Simplify asset recovery with smarter technology. Our RMS platform delivers real-time visibility and control over shipper returns, reducing asset loss, minimizing costs, and keeping your therapies moving efficiently.

## Reliable Support. Real Partnership.

With Peli BioThermal at your side, you get more than a product — you gain a partner who's invested in your success. Whether you're scaling operations, improving sustainability, or protecting vital patient therapies, we're here to help you move forward with confidence.
