

# Crēdo ProMed™

The Trusted  
Medical Carry  
Bag For First  
Responders  
& Pharma Reps

Behind every delivery is a healthcare professional relying on trusted technology to protect critical medical materials. The Crēdo ProMed™ carry bag is built to protect biopharma samples and medical supplies through every journey and every challenge. With its Golden Hour™ thermal technology and advanced PCM and VIP insulation, ProMed™ ensures materials stay at the required temperature for up to 72 hours delivering confidence, reliability, and protection when needed most.

## Proven Protection for First Responders

Crēdo ProMed was designed to build trust within the medical and biopharma transportation industry to protect the payload throughout its journey:

### Reliable Thermal Performance

Qualified to ISTA 7D standards, Crēdo Cube maintains precise temperatures for up to three days, ensuring correct payload condition from origin to destination.

### Error-Proof Assembly

Simple, standardized pack-out with TIC components minimizes handling errors, streamlining assembly when time is limited and critical.

### Lightweight and Durable Outer Bag

Constructed of highly quality and water resistant ballistic nylon fabric material designed to stand out and consistently perform.

### Portable and Easy to Carry

Comfortable padded shoulder straps and protective water and soil resistant bottom panel.

### Handy Document Pouch and Handle Strap

Easily store documentation and slide onto a telescopic handle whilst travelling.

### → Temperature Ranges

2°C to 8°C  
15°C to 25°C

### → Duration

72 hours  
(qualified to ISTA 7D)

### → Sizes

2L to 8L

### → Procurement

Purchase only

### → Longevity

Proved 5+ year lifespan

### → Sustainability

Fully reusable solution
