

# Crēdo Vault™

## The New Benchmark in Bulk Pharma Shipments

When therapies move in bulk, the stakes rise. Peli BioThermal's Crēdo Vault bulk shipper is engineered to safeguard life-saving treatments across long distances and complex distribution networks. With extended thermal reliability, interchangeable temperature ranges, and real-time visibility, Crēdo Vault gives commercial pharma the confidence to scale — without compromising integrity.

## Unmatched Thermal Reliability

Crēdo Vault was built for the challenges of bulk logistics — where failure isn't an option. It delivers:

### Scalable Cold Chain Performance

Qualified to ISTA 7D standards and compatible with both US and Euro pallets for global adaptability.

### Temperature Agility

One container supports multiple interchangeable temperature ranges, minimizing fleet repositioning and conditioning delays.

### Lightweight Efficiency

A lightweight shell cuts freight costs and reduces CO<sub>2</sub> impact.

### Volume Optimization

Four units per PMC reduces cost per shipment and improves environmental efficiency.

### Operational Ease

Pre-conditioned, ready-to-load design reduces pack-out complexity, errors, and turnaround time.

### Real-Time Visibility

IoT monitoring as standard, provides shipment tracking and actionable insight for proactive cold chain management.

### → Temperature Ranges

+2°C to +8°C  
+15°C to +25°C  
Below -20°C

### → Duration

120 to 168+ hours  
(qualified to ISTA 7D)

### → Tare Weight

399-477kg  
(temperature dependent)

### → Compatibility

Accepts US and Euro pallets

### → Efficiency

Four containers per  
aircraft PMC

### → Monitoring

IoT-enabled visibility of  
shipment temperature and  
GPS location

### → Model

Rental-only, reusable system  
for reduced waste with a  
range of 'One-Way' options

# Crēdo Vault™

## Purpose-Built for Global Distribution

Crēdo Vault meets the demands of commercial pharmaceutical manufacturers and logistics teams moving high-value, temperature-sensitive therapies across international lanes. It's a flexible, scalable solution for cold chain programs that leave no room for risk.

## More Than a Shipper

Peli BioThermal provides services that help you go beyond performance — driving efficiency, reducing waste, and protecting every shipment with greater insight and control:

### Total Cost of Ownership Calculation

We uncover the real cost of cold chain operations, including hidden expenses like freight, conditioning, inventory, and product loss — to help you ship smarter.

### CO<sub>2</sub> Footprint Calculation

Our team uses Life Cycle Assessments (LCAs) and CO<sub>2</sub> modeling tools to help reduce emissions and support your sustainability goals.

## Trusted Reliability. Proven Excellence.

With Peli BioThermal, you get more than a product. You gain a global partner dedicated to protecting therapies, patients, and the planet — shipment after shipment.

See how Crēdo Vault can transform your bulk cold chain needs:
