

Vëro One™

The Trusted Recyclable Parcel for Dry Ice Shipping

Vëro One™ is Peli BioThermal's innovative, recyclable dry ice shipping system. It delivers reliable protection for temperature sensitive therapies while lowering costs, simplifying logistics, and reducing environmental impact.

Protect Thermally. Ship Sustainably

Vëro One™ is Peli BioThermal's innovative, recyclable dry ice shipping system:

Reliable Thermal Protection

Maintains strict ultra-cold temperatures throughout transit, safeguarding your most life-saving shipments. With robust dry ice performance, Vëro One ensures critical medications arrive safely and on time, every time.

Carbons Emissions Reduction

A lightweight, recyclable build minimizes waste and reduces emissions, helping shrink your cold chain carbon footprint. Support your sustainability goals without sacrificing performance.

Freight Cost Savings

Cut shipping costs with an efficient design – lighter materials mean lower freight fees, and no return shipments means no reverse logistics expense.

Return-Free Convenience

One-way use with no return needed. Vëro One is the perfect solution when returning containers isn't feasible and ESG goals need to be met – simply ship out and recycle the packaging at its destination.

→ Temperature Ranges

Dry Ice
<-20°C
<-60°C

→ Duration

48-96 hours
(qualified to ISTA 7D)

→ Sizes

0.3L to 3.0L

→ Procurement

Purchase only

→ Recyclability

Paper recycling

→ Sustainability

Fully recyclable with
minimal waste

Vëro One™

Sustainable Protection Without Compromise

Patients deserve care delivered with both safety and responsibility. Our lightweight, recyclable dry ice system reduces emissions, eliminates return logistics, and lowers costs—all while ensuring every therapy arrives protected, on time, and uncompromised.

Tailored Cold Chain Protection, Backed by Expertise

Every therapy has unique requirements, and patients depend on precision. Our team works with you to design and implement the right recyclable dry ice solution—ensuring reliable thermal protection, regulatory compliance, and streamlined logistics. Through consultation and service, we help you safeguard treatments in transit while optimizing costs and reducing environmental impact.

Dry Ice Performance Calculation

Data-driven approach to optimize dry ice quantity and payload dimensions to fit product more efficiently without sacrificing quality.

Total Cost of Ownership Calculation

Understand the full financial impact of your cold chain, including hidden costs like storage, conditioning, and excursions.

CO₂ Footprint Calculation

Life Cycle Assessments and emissions tools help you reduce your environmental impact while maintaining product integrity.
