

# evo® DV10

## The Trusted LN2 Shipper for Shipping Cell & Gene Therapies

Behind every shipment is a patient waiting for treatment. The evo DV10 Smart Shipper is built to protect delicate cell therapies through the longest journeys and the toughest delays. With its dry vapor liquid nitrogen technology, the DV10 ensures that regenerative medicines arrive ready to load and ready to protect each shipment and patient at every stage of the cold chain journey.

## More Than A Shipper. Securely Connected

The evo DV10 is Peli BioThermal's innovative, LN2 smart shipping solution built to provide:

### Outstanding Thermal Performance

Reduce risk for longhaul shipments and transport delays. Maintains temperature the longest, even when tilted.

### Confidence

Shipments are safe with cloud-based integrated traceability, including actionable alerts for timely intervention.

### Long Battery Life

Supports at least 17 days of data recording and communication.

### Fastest LN2 Charging

Best in class charging for increased logistics efficiency.

### Durable and Tamper Resistant

Protect valuable payload condition and security.

### → Temperature Ranges

Dry Vapor Liquid Nitrogen  
-196°C

### → Duration

Static: 360+ hours  
Continuous 90° tilt: 65-84 hours

### → Sizes

4.5 L  
(5-9 250ml cassettes)  
(1-2 cryoboxes)

### → Procurement

Rental only

### → Sustainability

Fully reusable shipping  
solution

# evo DV10

## Smart, Secure and Compliant Cold Chain Management

The evoIST™ web application for evo Smart Shippers provides ongoing visibility to payload conditions on your computer, smartphone or tablet. Get information anywhere, anytime. You can also setup notifications so you never miss a critical event.

## Smart, Secure and Compliant Cold Chain Management

The evoIST™ web application for evo Smart Shippers provides ongoing visibility to payload conditions on your computer, smartphone or tablet. Get information anywhere, anytime. You can also setup notifications so you never miss a critical event.

### Shipment Visibility and Payload Condition Monitoring

Track location, ambient and payload temperature, battery, open lid, tilt and more

### Tailormade Alerts to Stay Informed and Connected

Customizable threshold configuration and alert notifications allows timely intervention

### 21 CFR Part 11 compliant

Ensures secure, validated data integrity while maintaining ultra-low temperature performance for the safe global transport of high-value therapies.
